Overview

Overview

Here are some key points & advantages of using this new tool in POS UX:

- You can customize and adapt your F&B menus to your liking, with dishes corresponding to starters, main courses, desserts, etc.,
- Easy and quick configuration in TMS by the user.
- User friendly & very intuitive to use in POS UX.
- You can charge for example the Daily Menu with its price and add products at €0 or with a price supplement if applicable.
- You can continue sending kitchen order ticket and fire the dish as usual.

TMS configuration

TMS configuration

As for **POS menu materials**, you must use specific materials for the menu. That is, not the materials themselves that make up the menu, but the main material referring to the menu itself (Menu of the day, Christmas Menu, etc.).

Request new POS materials through the material management in SAP:

ZEY_POS_MMNGM_TMS - Material management

Product Hierarchy	Unit	Material	Prod.Group	Language	Material Description
99020703	PC	99057698	GR1	EN	SUNSET MENU SEEN (M)
99020703	PC	99057700	GR1	EN	MENU DEGUSTACION MAIKO (M)
99020703	PC	99057694	GR1	EN	MENU DEGUSTACION GEIKO (M)
99020703	PC	99057699	GR1	EN	GASTRO EXPERIENCE SEEN (M)
99020703	PC	99057696	GR1	EN	MENU SEEN (M)
99020703	PC	99057701	GR1	EN	MENU SEEN BEVERAGE INCL (M)
99020703	PC	99057702	GR1	EN	GUSTAZO YAKUZA SHORT (M)
99020703	PC	99057813	GR1	EN	GUSTAZO YAKUZA LARGE (M)
99020703	PC	99057695	GR1	EN	GASTRO EXPERIENCE YAKUZA (M)
99020703	PC	99057697	GR1	EN	CANARIAS VIVA (M)
99020701	PC	99057910	GR1	EN	DAILY LUNCH MENU GUILTY (M)

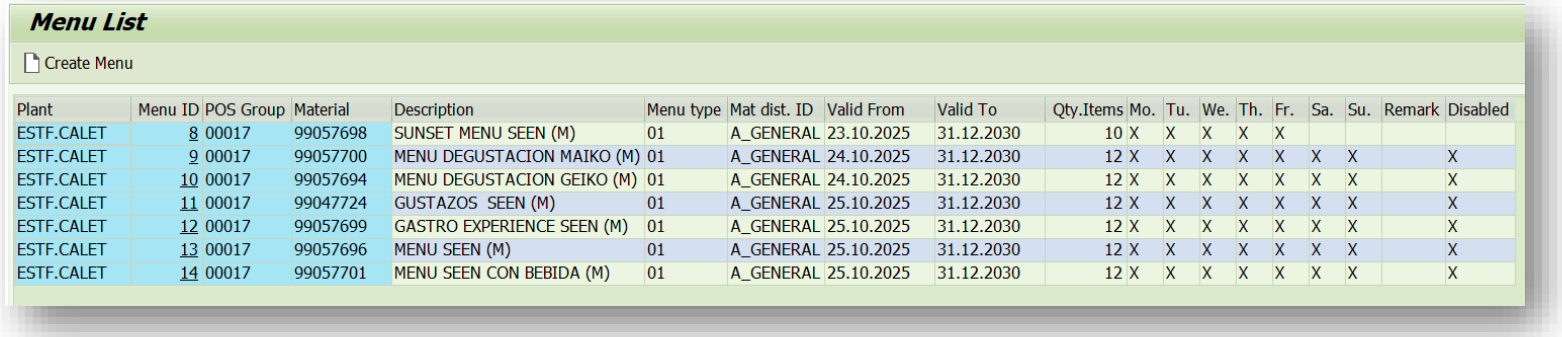
- Product hierarchy in the material must always be Menu.
- Material description must always end with the letter (M) in parentheses.

TMS configuration

The transactions used in TMS to create the menu in POS UX are the following ones:

/CCSHT/POS_MN_LIST - Menu List

To create a new menu or customize an existing one.



Menu List

Create Menu

TMS configuration

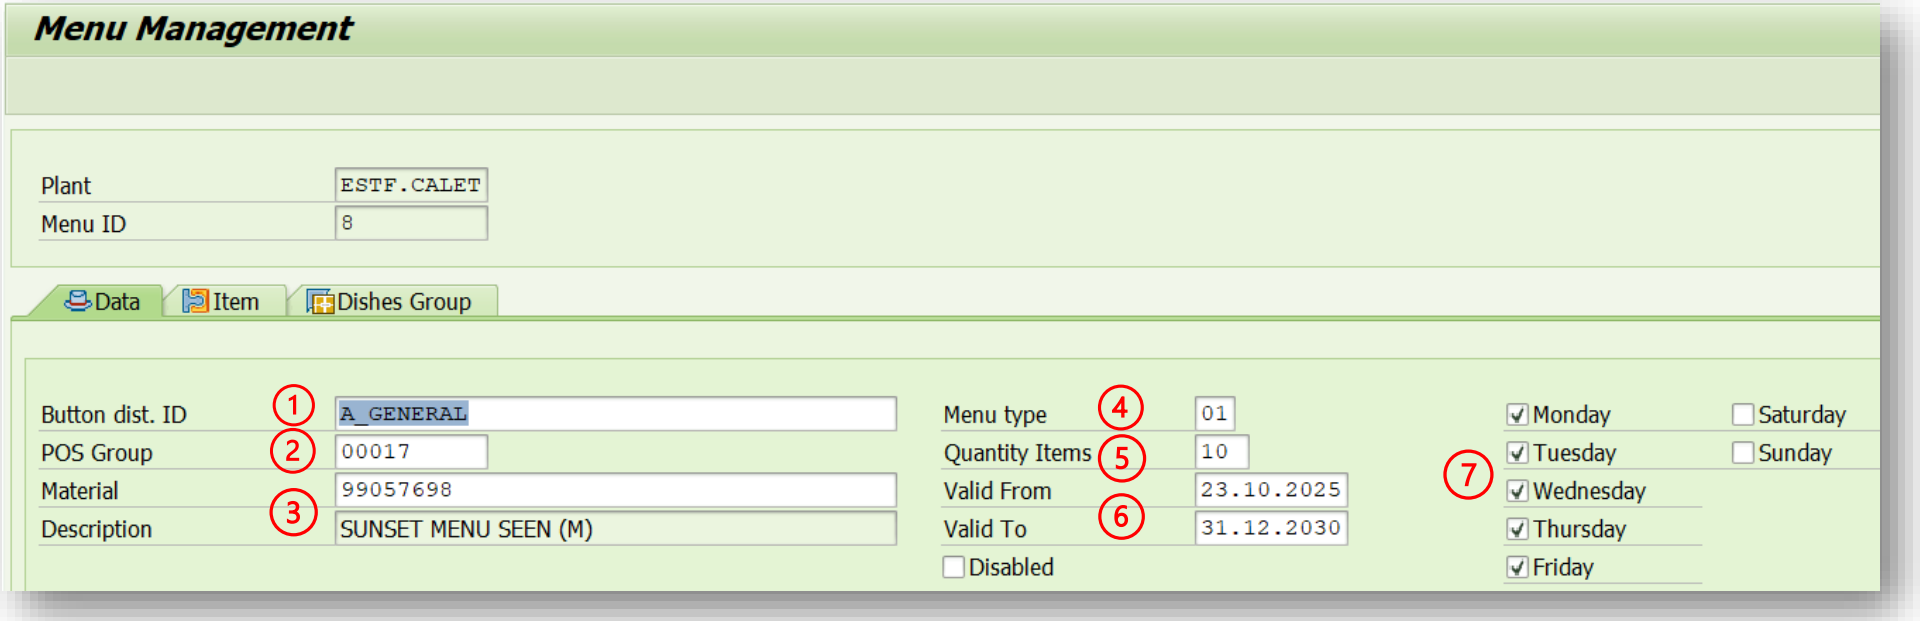
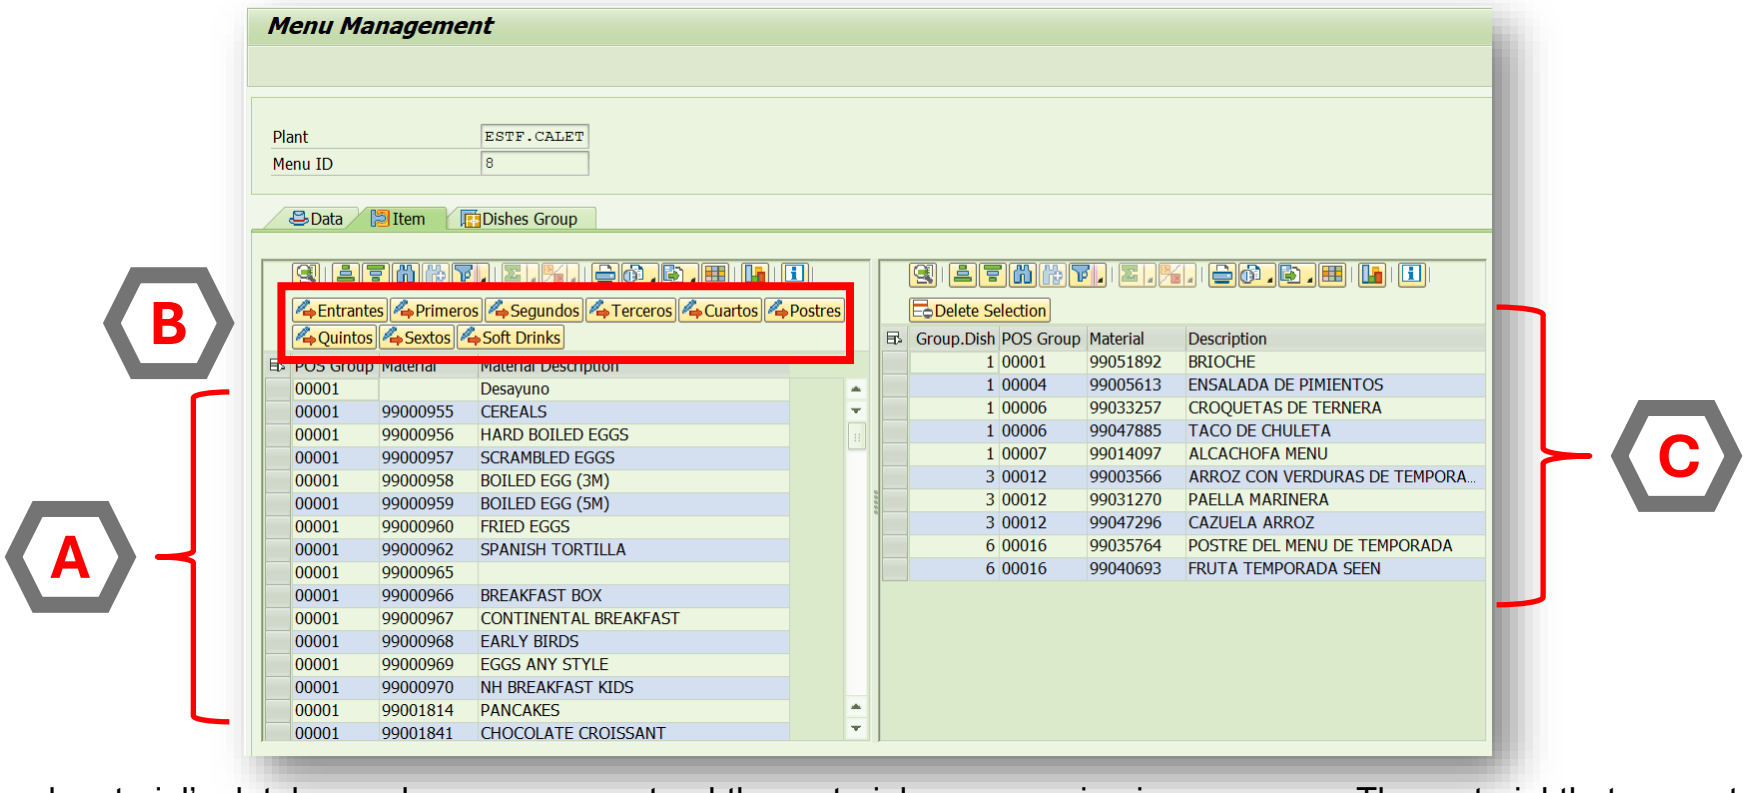
3. Complete the **Data tab** with the corresponding information (*points 1 & 2 are always the same data).



1. A_GENERAL
2. 00017
3. Material number of the Menu
4. Choose if the menu is open or closed
5. Number of dishes that make up the menu.
6. Valid dates + “Disabled” option
7. Days of the week when the menu is active

TMS configuration

4. Complete the **Item tab** by extending the materials and choosing their corresponding Kitchen Group.



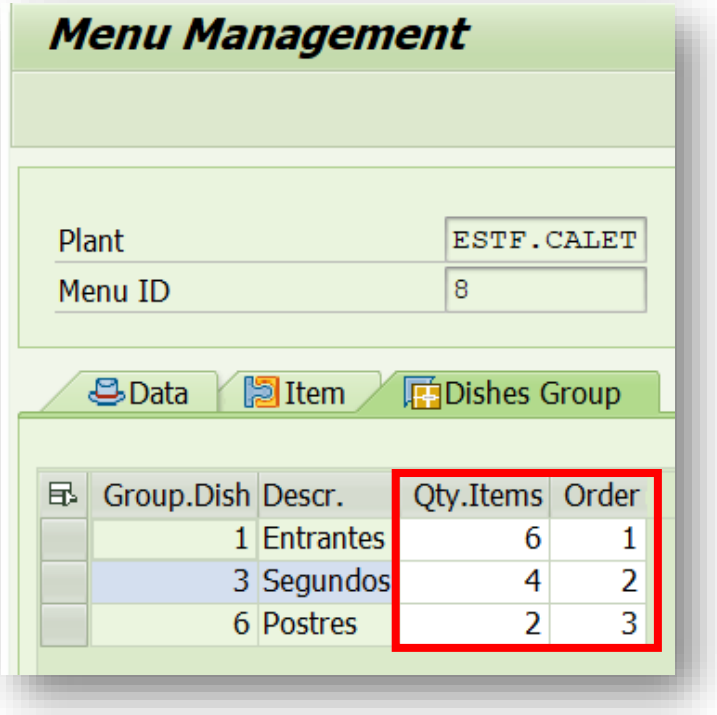
A) General material's database where you can extend the material you are using in your menu. The material that you extend must be exist in your outlet's database.

B) Choose the kitchen Group (Starter, First, Dessert…) to configure it in POS UX. If you want to have the same material in different kitchen groups, extend it again with the corresponding one.

C) All the materials that make up the menu and the corresponding kitchen group you have selected.

TMS configuration

5. Complete the **Dishes Group** tab.

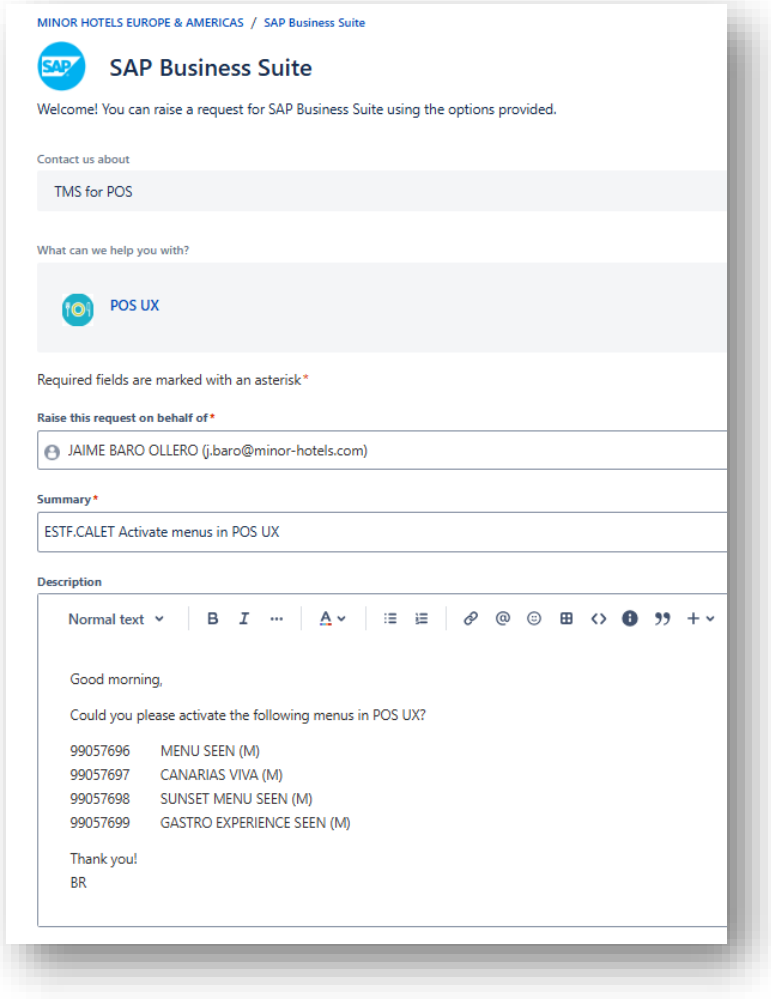


- **Qty Items**: Number of dishes that make up the corresponding Kitchen Group (Starter, First, Dessert). Please note that if it is set to 2 and you want to load 3 dishes into this Kitchen group in POS UX, you will have exceeded the limit and will not be able to charge that product.

- **Order**: in what order the kitchen groups will appear visually in POS UX.

TMS configuration

6. Open a **Jira** requesting activation of the materials you want to use for menus in POS UX to complete the entire configuration.



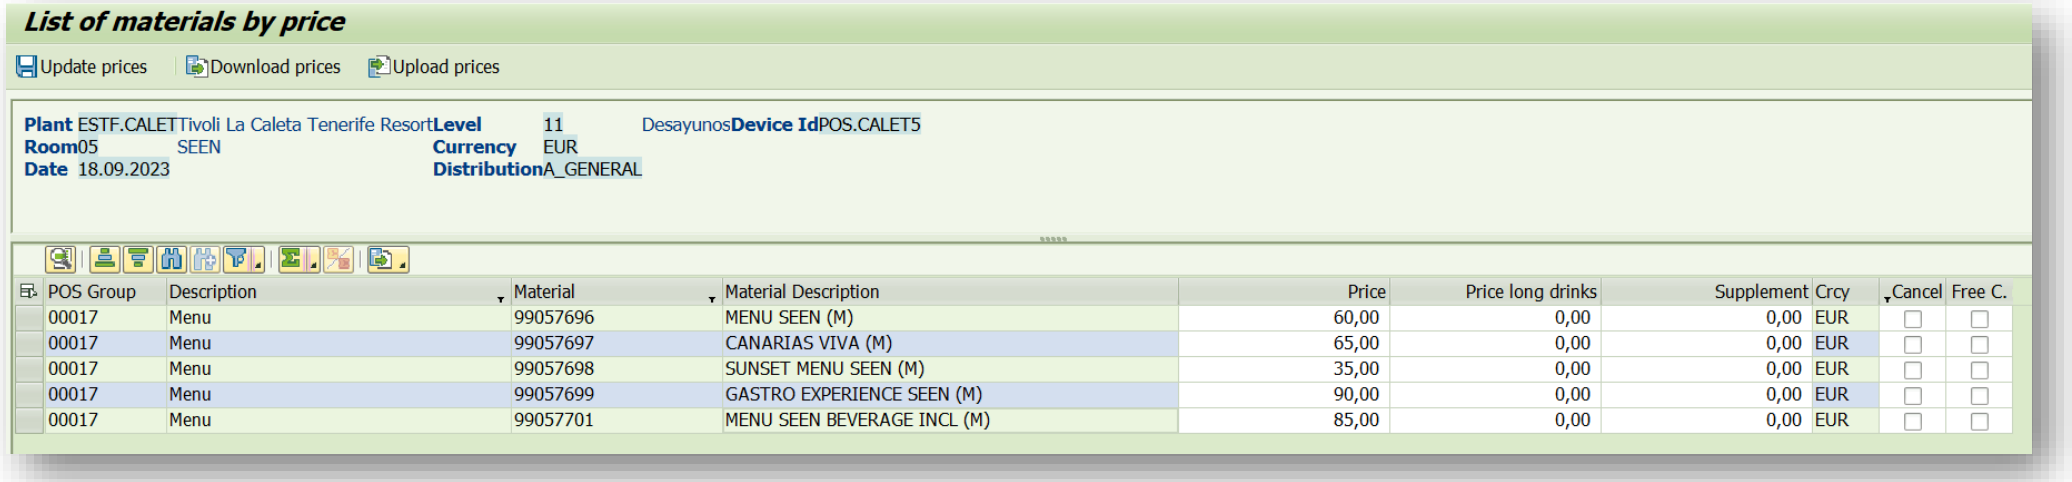
Categories

SAP Business Suite > TMSforPOS > POSUX

Please don't forget to include the material number for each one

TMS configuration

The **prices** of the menu will be managed through the Price levels transaction:
/CCSHT/POS_PRICE_LEV - Price levels



List of materials by price

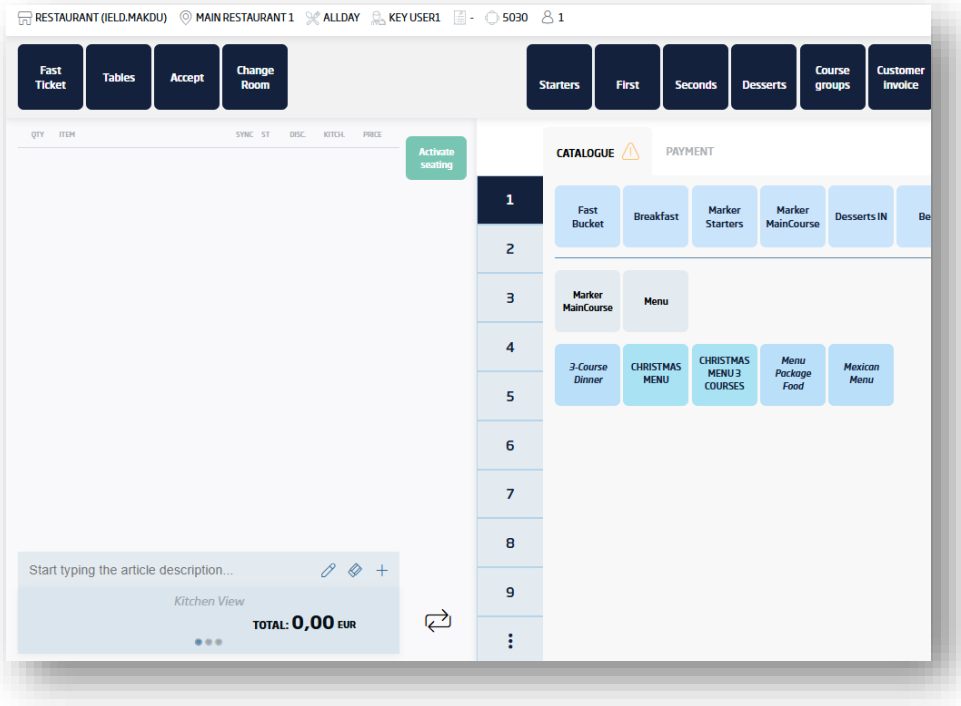
POS UX management

POS UX management

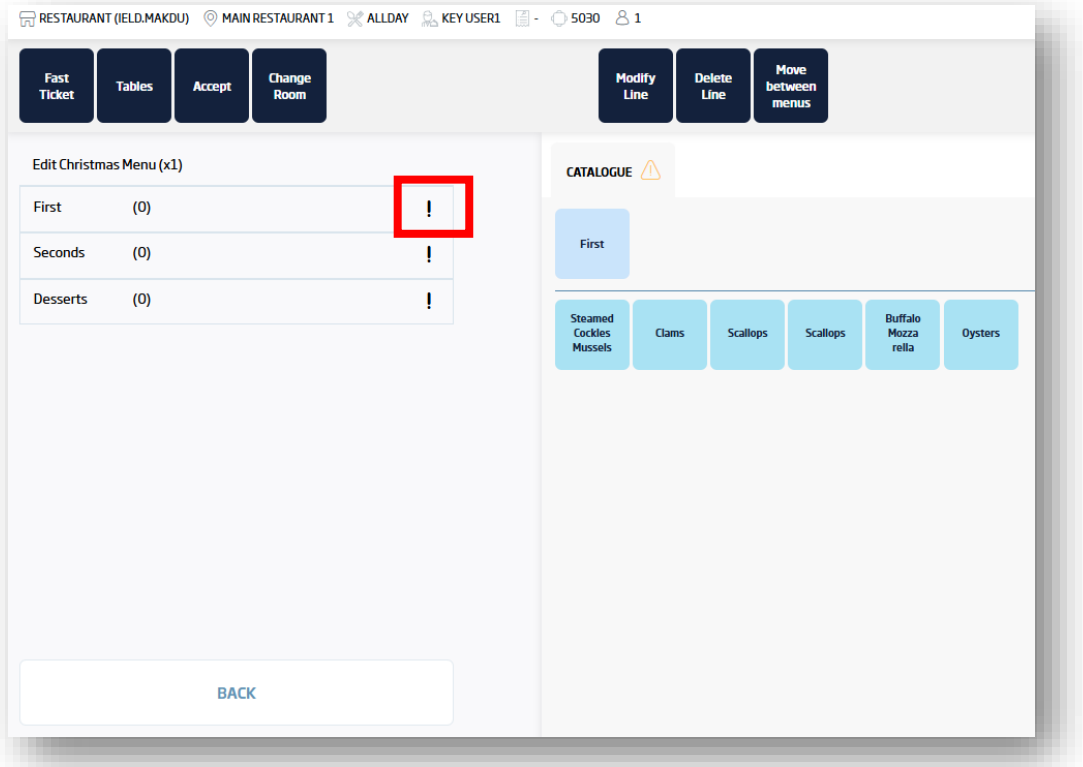
Once all the configuration is done in TMS with the menu, you can proceed to start using it in POS UX.

1



Choose the Menu and its quantity depending on the covers.

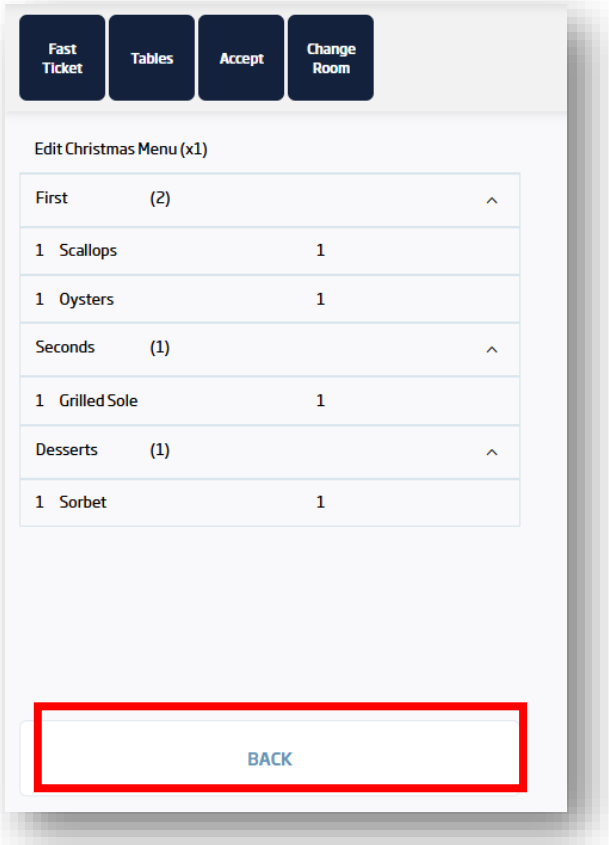
2



A visual mask will appear and when you hit the exclamation mark in the type of Kitchen Group, the corresponding dishes will be available.

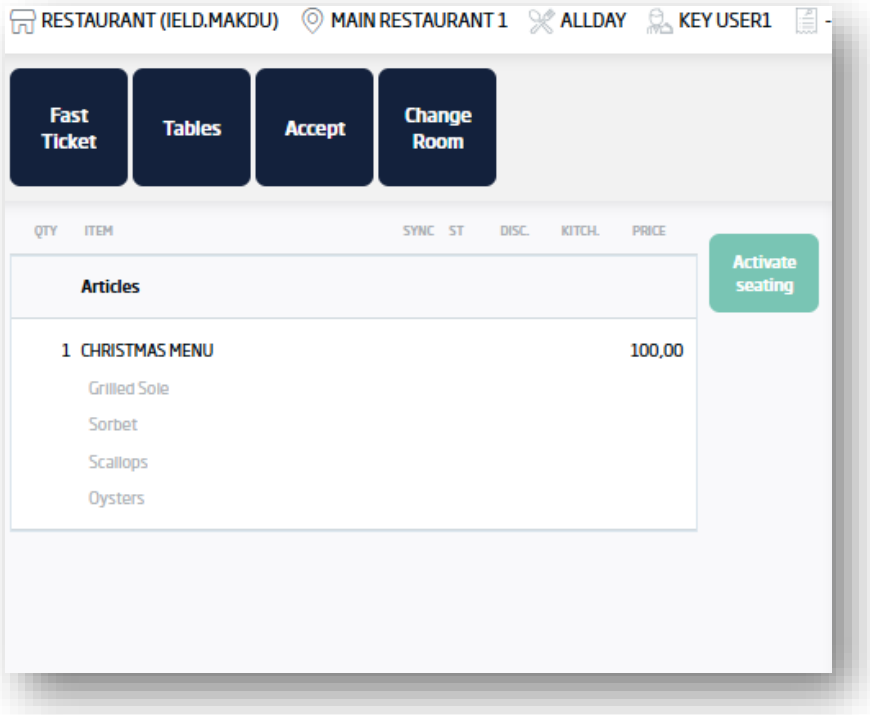
POS UX management

3



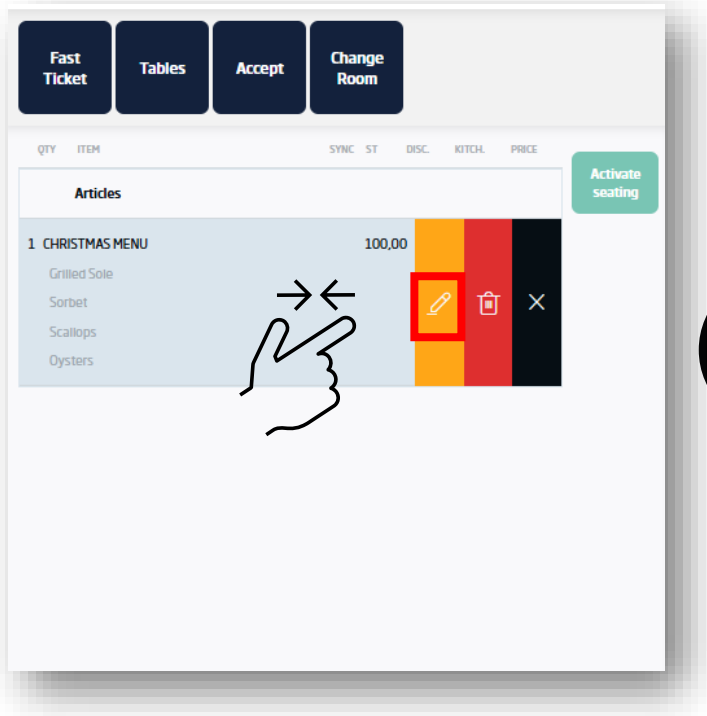
Once you have added all the dishes, click on the “Back” button.

4

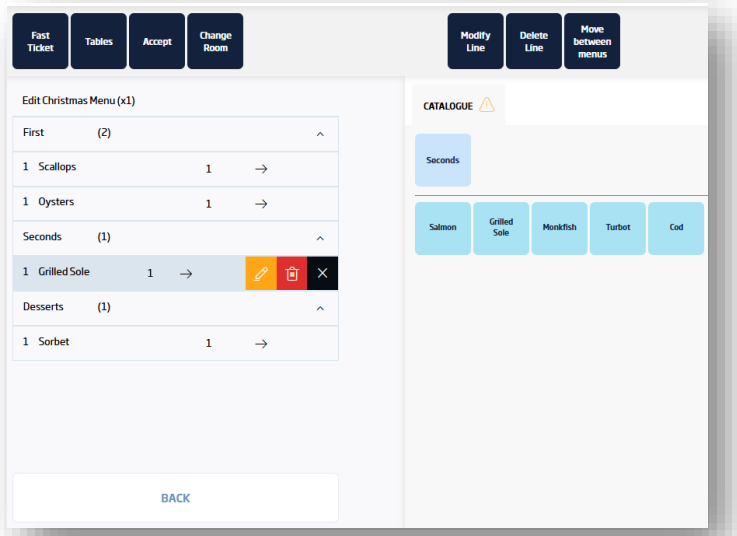


The menu will appear with its price and below it will be a breakdown of all the selected dishes (only for the kitchen order ticket).

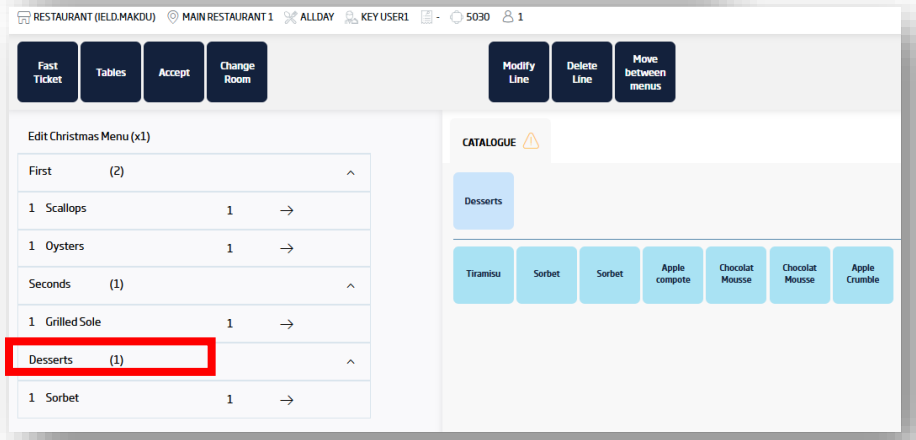
POS UX management



In case you want to edit anything, swipe and use the “Modify Line” option to open again the mask and the menu.

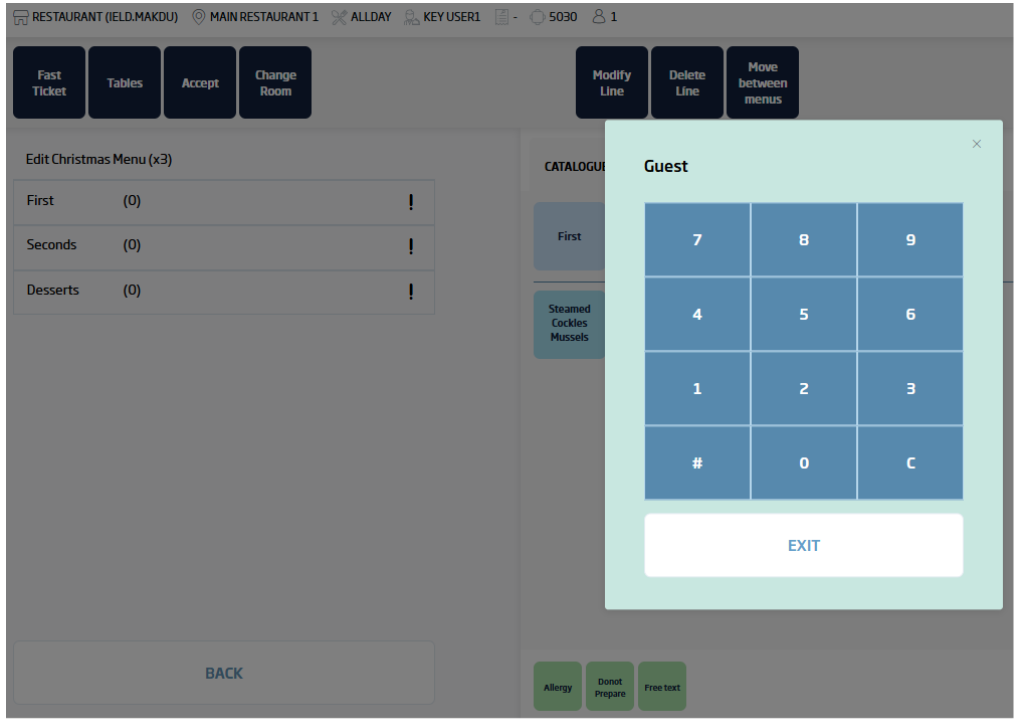


You can still editing & deleting products.

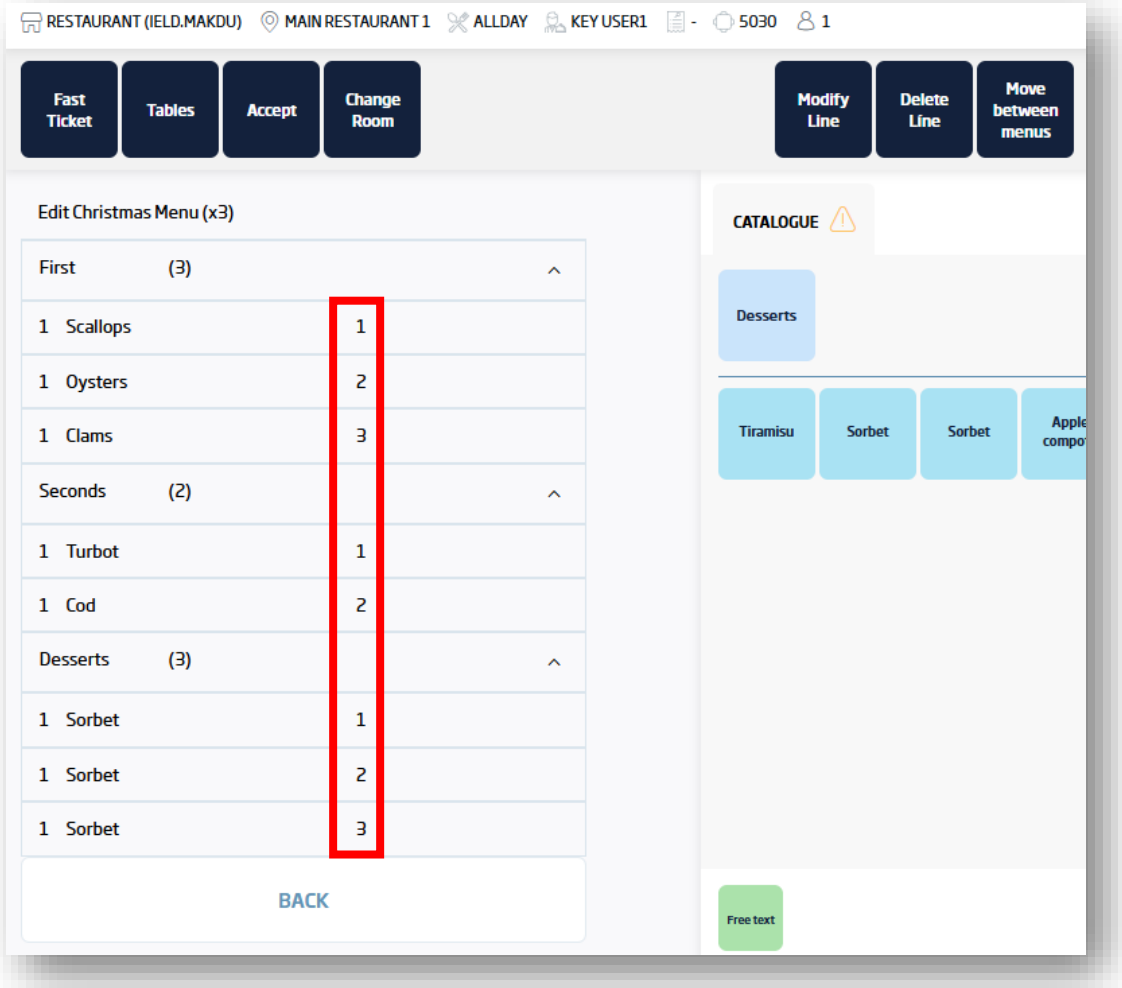


Or add more products by clicking the “Kitchen group” button and selecting the dish.

POS UX management

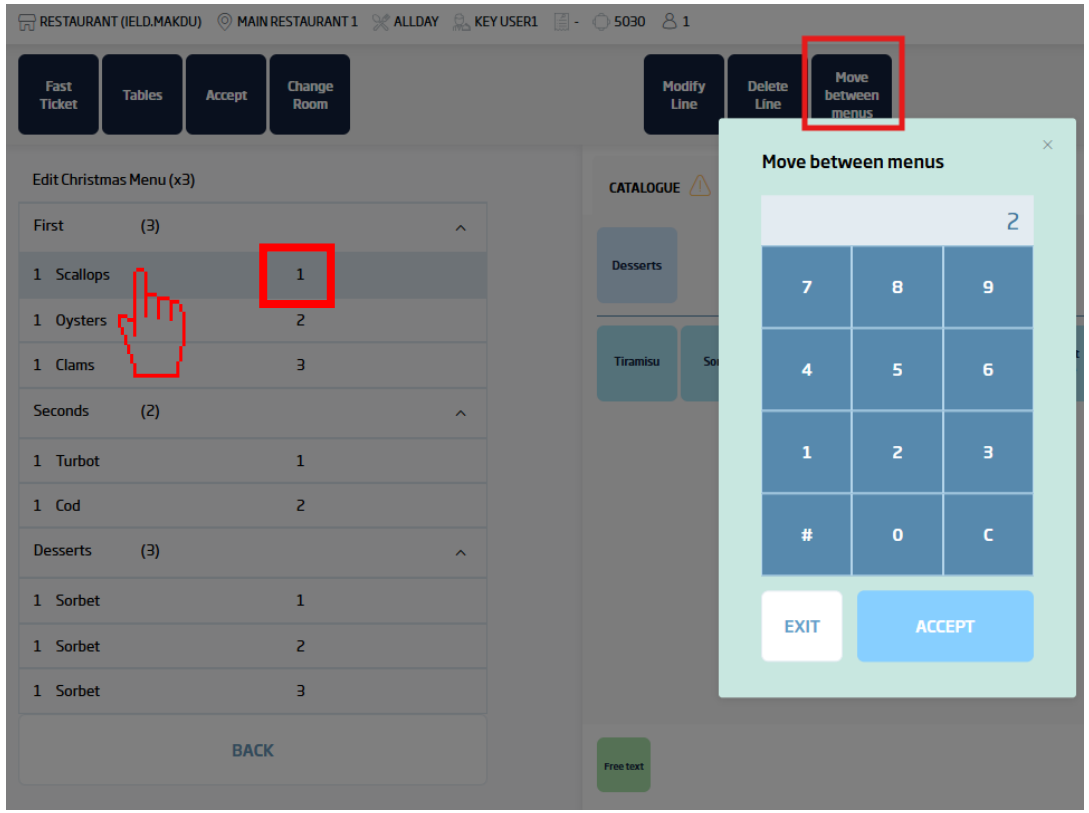


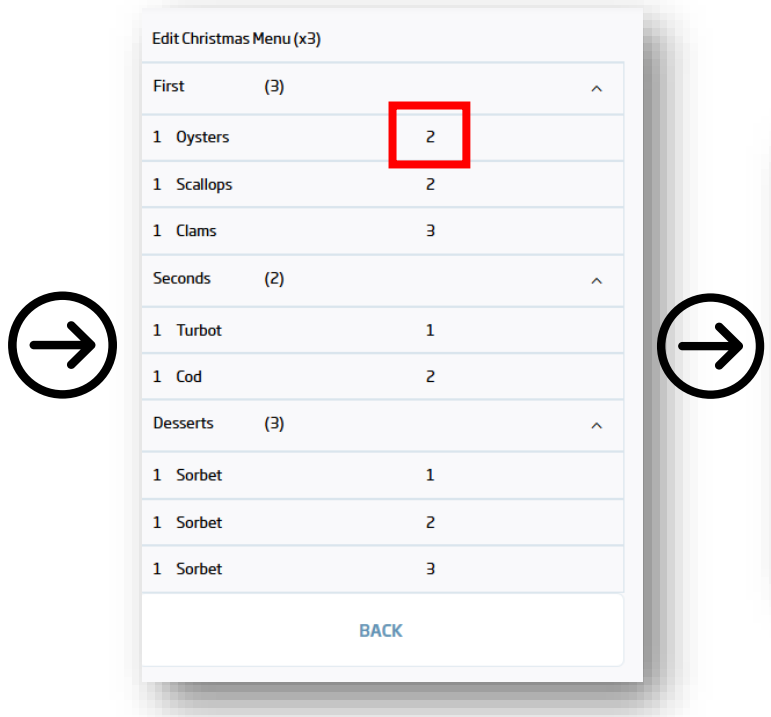
If you are managing more tan 1 menu, you will need to type the cover when choosing their dishes.

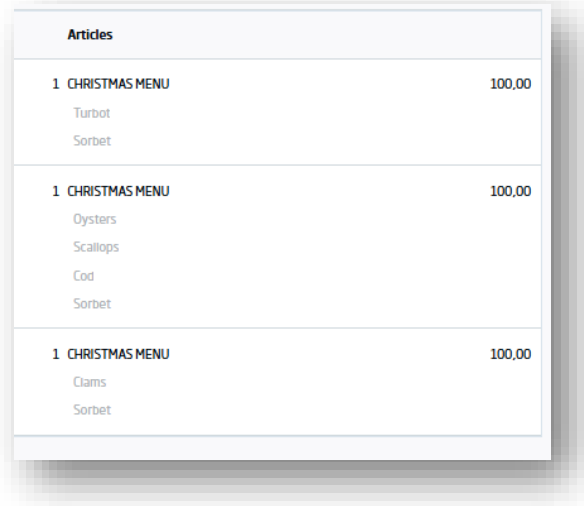


For example, menú x3 people. In this way, it will displayed with their corresponding selection.

POS UX management







"**Move Between Menus**" button, will allow you to change the position of the cover/menu.

In the previous example, we have moved the "Scallops" (1) to Cover/menu (2), therefore the change will be applied in the ticket.

POS UX management

If you have applied any **price supplements** to specific materials, these will be added to the total ticket price.
