SAP MM PROCUREMENT PROCESS INTRO

Characteristics

1

General concepts

Unique ERP Tool for all the PTP process

Standardized process.

Unique category tree for all BU's.

2

Purchase orders (PO)

All purchase orders (PO) must be done via SAP.

PO's must be done before the service is done / goods received.

Approval flow.

3

Master Data

Procure to pay dept manages the Master Data in SAP.

4

Goods receipts (GR)

The receptions (goods, services) must be done via SAP.

The GR implies an automatic accounting.

5

Invoices

Vendors must include the PO number in the invoice to be accounted.

Any discrepancy between GR and invoice will generate an automatic incidence in SAP.

6

Reporting

Fast centralized reporting.

Real time info.

PO, GR, Inventories.....

SAP MM PROCUREMENT PROCESS INTRO

Participants

MDM (PTP AREA)

Responsible for the SAP MM
Module data

BUSINESS PROCESSES MM

Responsible for training and giving
support in everything related with
the procurement process

COPERAMA

Responsible for negotiating prices
and nominated vendors

ADMINISTRATION (PTP AREA)

Responsible for accounting
invoices

SAP MM PROCUREMENT PROCESS INTRO

Concepts

Company Code

Legal name of the Hotel Company . E.g.: DK01 NH STANDGADE APS; ES10 NH HOTELES ESPAÑA SA; DE01 NH HOTELES DEUTSCHL. GMBH ...

Purchase Organization

Set of centers that belong to the same region.
E.g.: DK10 Hovedstaden; DE12 Bremen Niedersachsen...

Business Area

SAP Hotel/Central Serv code. E.g.: 1010=NH Collection Copenhagen.
Every hotel has its own warehouse structure.

Warehouse

Physical warehouse in a business area. E.g.: 1001 Kitchen. SAP Users only can see warehouses, but the warehouses are related with a COCE except the general warehouse.

Vendor

A person or company that sells goods or services to us, in SAP every vendor has an SAP number, and it is unique for all the company.

Material

Every article or service that Minor Hotels Europe & Americas procures, stores....
It is the company's central source for reporting and accounting

Master Data

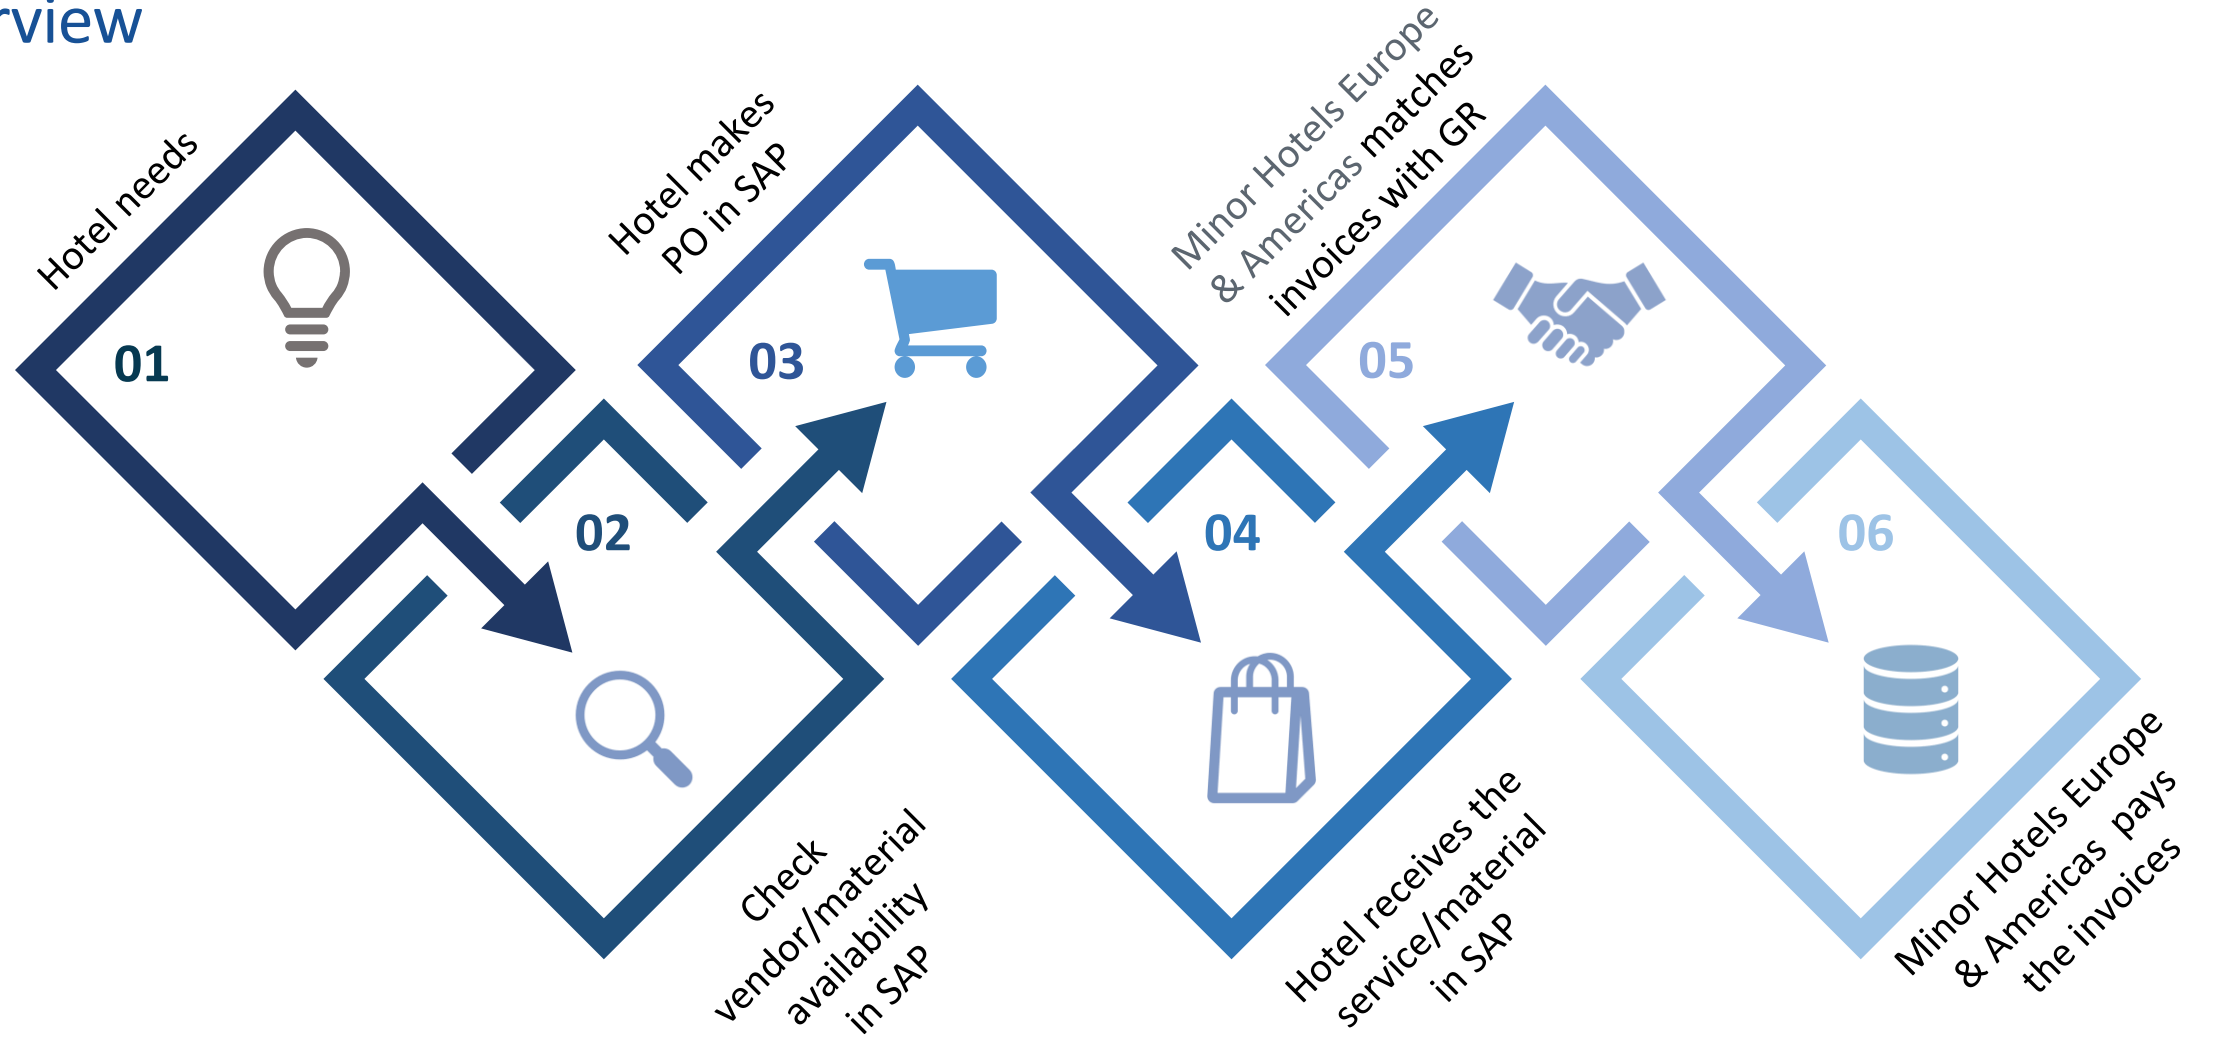

Master data is the core data that is essential in SAP, it is created centrally, it remains over time, but it is updated on a regular basis. E.g.: Vendor is a type of master data that is used for creating purchase orders.

Transaction

A transaction consists in a code of letters, numbers, or both.
You use a transaction code to go to any task or get a report in SAP.

SAP MM PROCUREMENT PROCESS INTRO

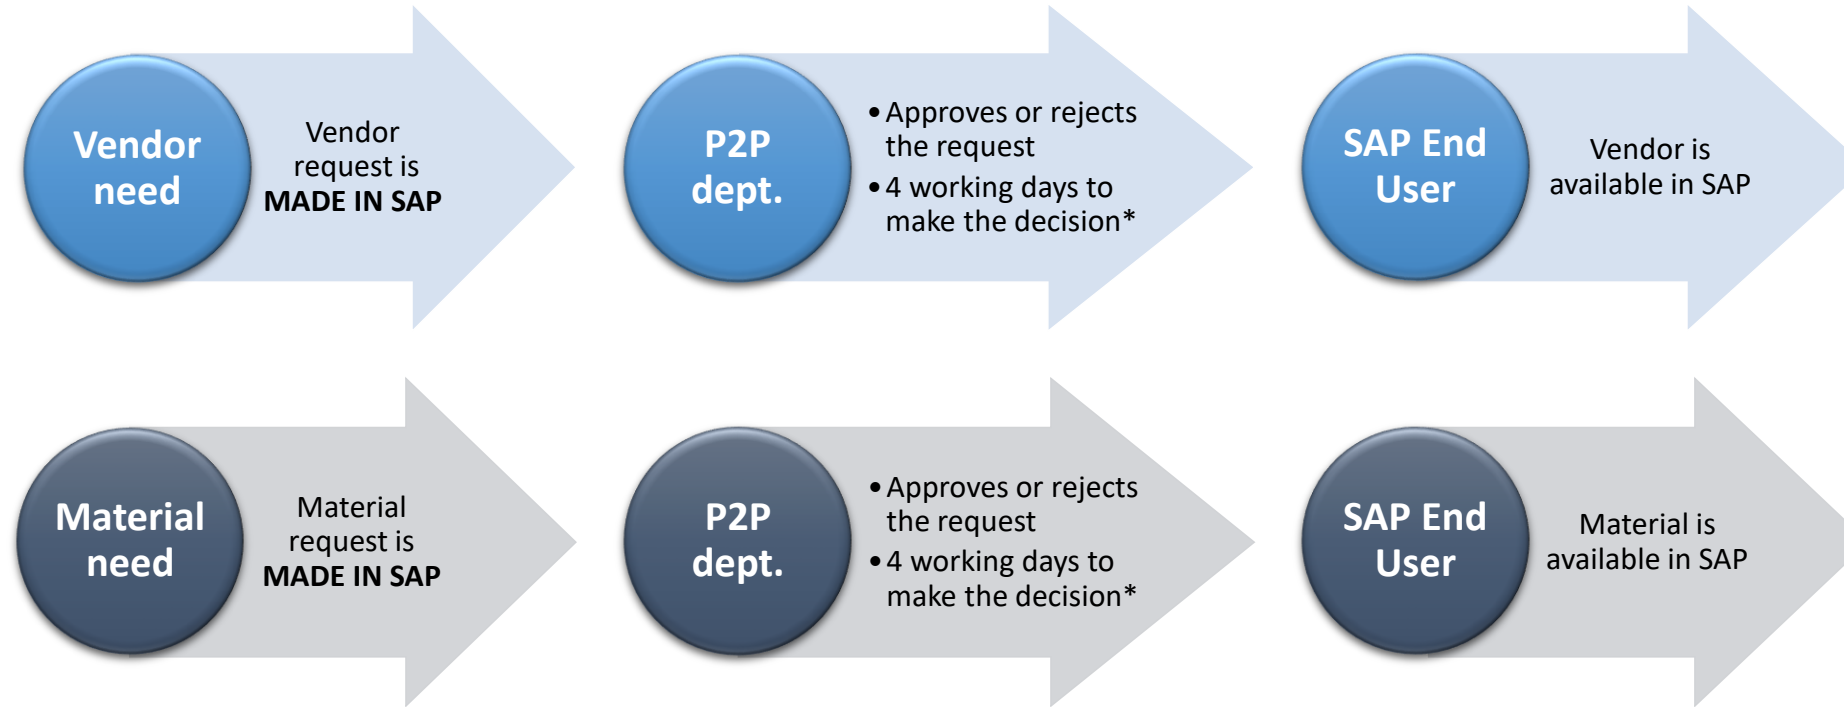

Overview

SAP MM PROCUREMENT PROCESS INTRO

Master Data Management: vendors & materials request in SAP

The process and timing of requesting vendors and materials in SAP is schematically as follows:

**MANDATORY
PROCESS
MANDATORY**

TIP!

Since the process can take 4 days (or 8 if it's vendor + material), if you want to have it available on time, the best way to achieve it is to **plan in advance!!!**

SAP MM PROCUREMENT PROCESS INTRO

Supplier Data Management: vendors classification

We can classify our vendors depending on 4 characteristics:

- Type of agreement we have with them
- Invoice classification by Minor Hotels Europe & Americas
- Way of invoicing
- CAPEX vs OPEX

1) Vendors classification according to the type of commercial agreement with Minor Hotels Europe & Americas:

Vendors without agreement with Minor Hotels Europe & Americas. We can work with them to cover an operational need, but we must redirect these consumptions to nominative vendors if possible.

**NON-NOMINATED
SUPPLIERS**

**NOMINATED
SUPPLIERS**

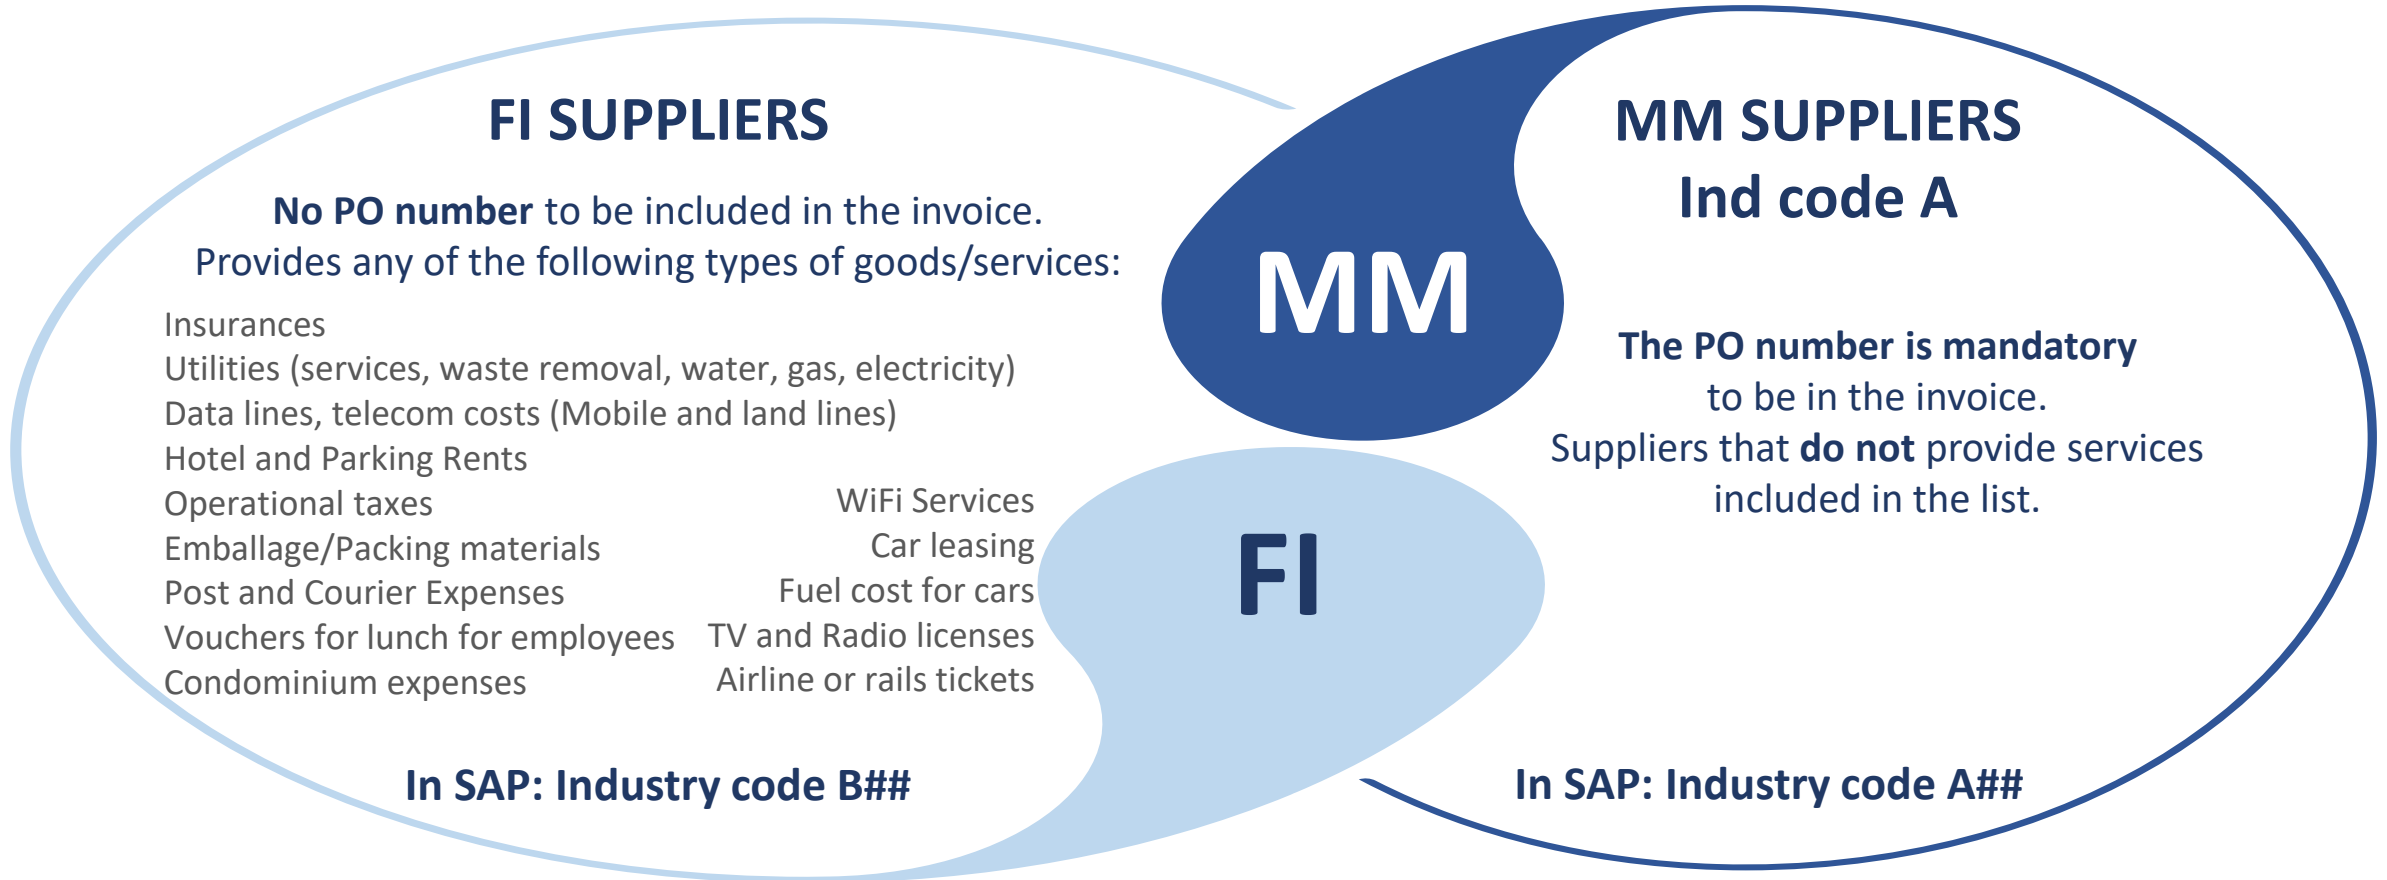

Vendors with a commercial agreement with Minor Hotels Europe & Americas (Coperama), at the HQ or BU level, and this agreement defines prices, rappels, delivery time and frequency, etc. It is mandatory due to our purchasing policy to prioritize working with these vendors.

SAP MM PROCUREMENT PROCESS INTRO

Supplier Data Management: vendors classification

2) Vendors classification according to the invoice classification by Minor Hotels Europe & Americas:

SAP MM PROCUREMENT PROCESS INTRO

Supplier Data Management: vendors classification

3) Vendors classification according to the way of invoicing:

PAPER INVOICING

ELECTRONIC INVOICING

WEB

EDI

SAP MM PROCUREMENT PROCESS INTRO

Procurement execution: Purchase Order (PO)

A Purchase Order (PO) is the only valid way to request a merchandise or a service from a supplier.

Main features of the PO:

1. The PO must be done at the moment the need arises in the hotel, as general procedure, always before the merchandise is received or the service is done.
2. It is strictly forbidden to make orders by mail, phone...
3. PO must be made by SAP and will generate a number started in 45x... for Opex or 8... for Capex.
4. Suppliers receive these orders through their mail.
5. The PO number must be included by the vendor on the invoice.

To consider: some orders (IT, maintenance & projects, marketing, supplies & recurring operating expenses) are subject to a release process, in which you are the first approver. In the following link you can consult the approval flow for MM in hotels.

[MM Approval Wokflow](#)

SAP MM PROCUREMENT PROCESS INTRO

Goods Receipt (GR) Management: general concepts

- The reception implies an accounting entry.
- Reception in SAP must be done as soon as the goods / services are received in the hotel.
- It is necessary to write the reception number on the delivery note / packing slip.
- There is a tolerance to receive a percentage greater than the amount requested 99%.
- If the reception exceeds the tolerance limit, the user must modify the requested quantity.
- If the reception is not done on time or correctly you will have invoicing incidences (pay attention to next slides).

SAP MM PROCUREMENT PROCESS INTRO

Procurement Process: pain points

Goods/Service need

Purchase order
creation in SAP

Goods received or
Service done

Reception in SAP

Vendor or material is
not in SAP!!!

Always plan in advance.
If needed, use the
emergency process for
vendor and material
requests.

Vendor is not delivering, or
material delivered /service
provided is different than
the one in SAP!!!

Modify the PO to adapt to
the goods received service
done. Inform the vendor
that this without advising
can generate delays in
payment.

I didn't' make the
reception in SAP.
I cannot make the
reception in SAP!

Make receptions in
order and on time to
avoid incidences.
Open a JIRA ticket if
necessary for extra
help.

SAP MM PROCUREMENT PROCESS INTRO

Invoice travel

Vendor's Administration office:

Vendors **MUST** send the invoices to NH_invoice@epsportal.com with all the data required by Minor Hotels Europe & Americas provided in the invoicing instructions and in every PO PDF.

Lisbon document processing center:

The invoice header checker (hotel data, fiscal data, PO, ...).

- ✔ OK → Process the invoice for posting.
- ✘ KO → Reject to vendor informing him by mail about the rejection reason.

Administration Manila's office:

The invoice will be tried to be posted checking with the data in SAP:

- ✔ Invoice matches SAP data → Invoice posted and ready for payment.
- ✘ Invoice does not match SAP data → Invoice incidence will be created in SAP to ask for extra info to the hotel to post the invoice.

HOTEL:

The hotel must manage the invoicing incidents to give the information requested by the SSC to post the invoice or request a Credit Memo if it does proceed.

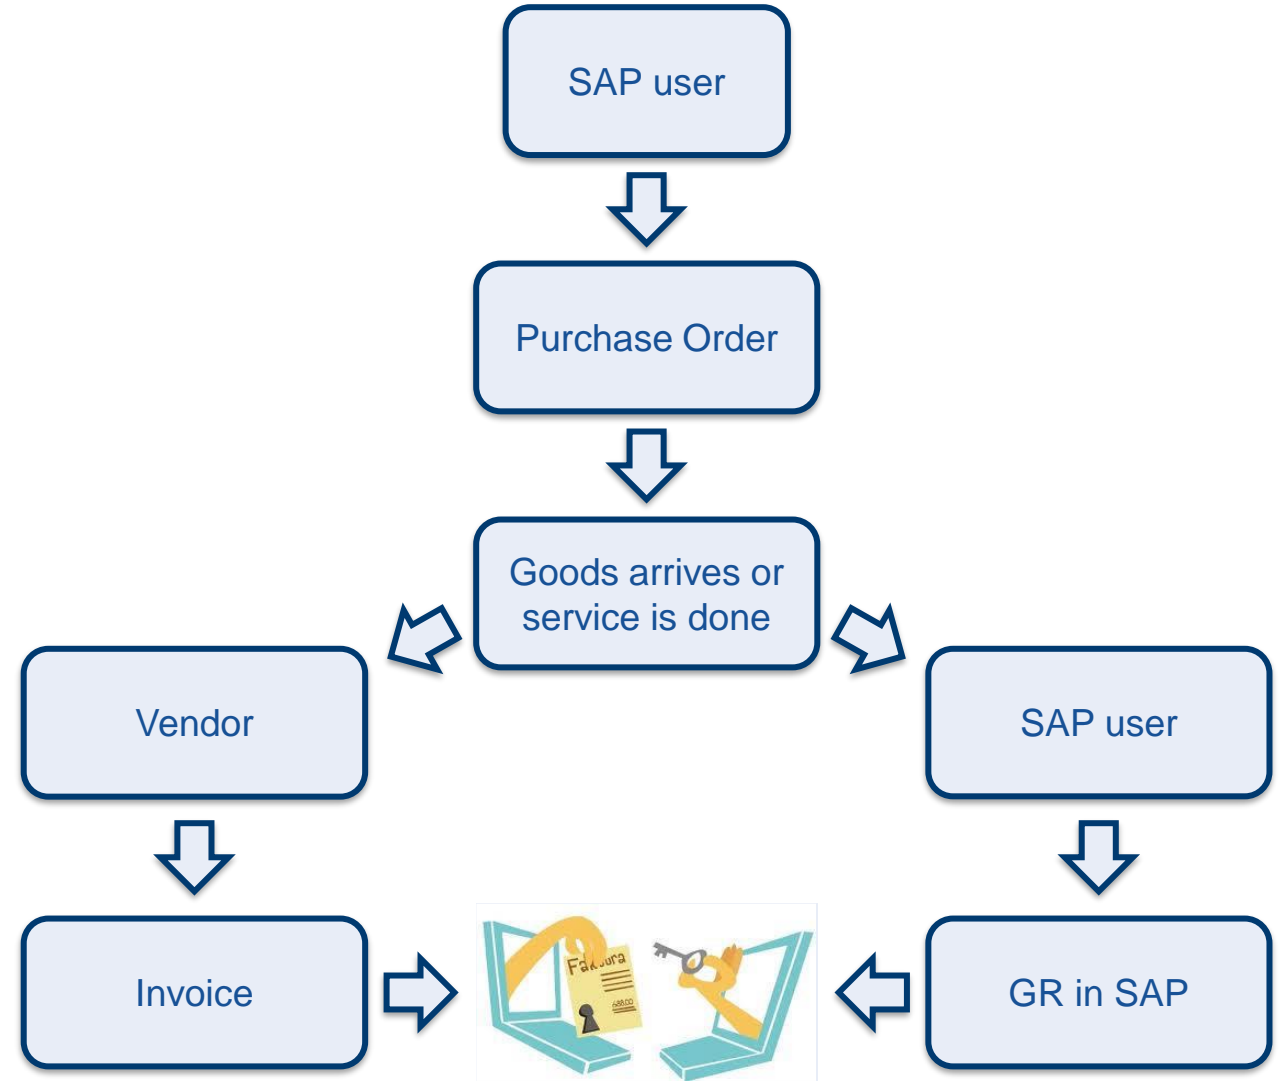

SAP MM PROCUREMENT PROCESS INTRO

Invoicing incidences: general concepts

What is an incidence?

An incidence is a discrepancy between the reception done by the user and the invoice billed by the vendor.

Till the incidence is solved the invoice will be **BLOCKED FOR PAYMENT**. So, to avoid any service problem, we must solve incidences as soon as possible.

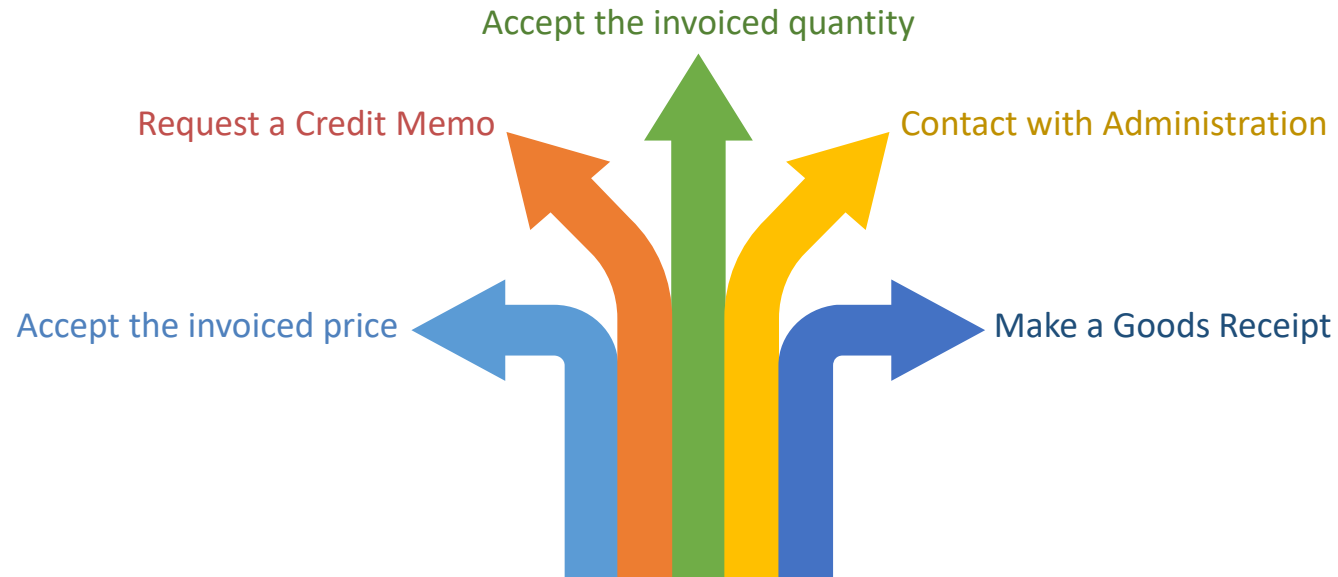

SAP MM PROCUREMENT PROCESS INTRO

Invoicing incidences: general concepts

Generating an incidence is the **only communication channel** that the CS or supplier (in case the supplier it is a portal or EDI vendor) has to ask us about a discrepancy observed between the invoice and the existing GR in SAP.

Until we solve the invoice incident, the invoice can not be processed and therefore paid.

Therefore, solving an incident is simply to **MAKE A DECISION** on who is right in this discrepancy, and for that we will have to have as much information as possible about the case under study.

SAP MM PROCUREMENT PROCESS INTRO

Invoicing incidences

Where can I see if I have any incidences?

When the system detects a discrepancy between the GR and the invoice, it triggers a workflow in SAP and the user receives an incident notification in their SAP Business Workplace. Then, the user must review the incident and once resolved, the invoice is posted/released for payment and the workflow ends.

The image shows two screenshots from the SAP system. The top screenshot is the 'SAP Easy Access Menu for Hotel Employees ESMD.EUROB'. It features a search bar and a list of menu items: Favorites, SAP Menu, Click&Hire, MM, and TMSforHotels. A red box highlights the 'MM' icon, and a red arrow points from it to the 'Workflow 3' table in the bottom screenshot.

The bottom screenshot is the 'Business Workplace' interface. It shows a navigation pane on the left with 'Entrada' (Inbox) expanded, listing 'Documentos no leídos 0', 'Documentos 45', 'Workflow 3', 'Entradas atrasadas 0', 'Mensajes de fecha 0', and 'Entradas erróneas 0'. The main area displays 'Workflow 3' with a table of incidents.

SAP MM PROCUREMENT PROCESS INTRO

Invoicing incidences

- Keep in mind the table below, it can help you have an overview of what is happening.
- Before requesting a Credit Memo or rejecting an invoice, please double check.
- If you need further help, please contact the S&T MM team via Jira. In the following link you will find help to select the correct category where you should open the Jira ticket: [JIRA MM Structure](#).

Typology		Cause	Responsible	Accounted	How to solve	
					The invoice is correct	The invoice is NOT correct
Price Incidences	Price incidences in NOT NOMINATED VENDOR	The Supplier invoices higher prices that the Good receipt in SAP	Hotel	Yes (Blocked for payment)	Accept the invoice and liberate the invoice for the payment	Ask for a Credit Memo
	Price incidences in NOMINATED VENDOR		MDM Team			
Quantity Incidences	Quantity incidences	The supplier invoices more quantity than we have made the GR in SAP	Hotel		Accepting the missing quantity	
Parked Invoices	Packing Slip Missing	Administration can't "find " the line / packing slip that is in the invoice	Hotel	No (Parked)	Making the missing GR	Reject the invoice
	PO Consumed		Hotel			
	PO Line Missing		Hotel			

SAP MM PROCUREMENT PROCESS INTRO

Inventory: general concepts

- The inventory is a detailed, ordered and valued list of the elements that make up the warehouse of a company at a given time.
- The inventory process has accounting consequences.
- The warehouse counts must be made at the times designated by the company.
- The inventory counting sheet must be completed without crossing outs, no corrections, not with pencil, and with clear numbers, and must be signed.
- They should be done with great care, considering that we are counting in the same units that the inventory count sheet reflects (verify with the prices).

Steps of the Inventory Process

This process is fully documented in the Digital Knowledge Workplace (nhorganization.com): [Physical Inventory Execution](#)

SAP MM PROCUREMENT PROCESS INTRO

Procurement escalation matrix

The communication and escalation process between all the parties directly related to the Procurement Process shows a matrix with the **leading cases** of interaction in procurement administration and explains **how to behave in each of them**.

You can find these documents in our Digital Knowledge Workplace (Organization Portal):

Procurement Communication and Escalation Matrix

Use case	Reporter	Responsible	Channel	How to behave to this case?
The nominated vendor does not cover the service expectations due to quality or service issues.	 Hotel	 Coperama		The hotel will contact Coperama to escalate any quality or service issue arisen that can solve the problem with the actual vendor or providing an alternative.
Price errors detected before receiving the invoice (when creating the order or consulting the database)	 Hotel	 MDM	 Jira	Open a JIRA ticket in SAP MM (Materials Management) in category > Nominated Vendors Data Base
The PO received by the vendor contains data different from the signed with COPERAMA	 Supplier	 Coperama		Anyone receiving this request from the vendor must address the vendor to Coperama (for Nominated suppliers only), so that the incident can be escalated to MDM by electronic correction.
Doubts about the status of an invoice	 Supplier	 Vendor Query		Anyone receiving this request from the vendor must address the vendor to VQ.
