

Adyen payments Management

Business Processes – Operations | July 2025

Objective & scope

This manual explains the standard process for managing prepayments collected via the Adyen virtual payment gateway, for all countries using this platform.

It provides step-by-step guidance for recording prepayments from website reservations in TMSforHotels. These payments are collected automatically through Adyen, hotel team members only need to record them under the guest's booking in the system – no collection at Reception is needed.

Countries not using Adyen should refer to the [Prepayment Guarantee Management](#) manual.

Adyen web – Payment methods

In Adyen, we process different types of payments that must be registered correctly in TMS4H using the appropriate payment codes:

Payment method code

PPAMEX → Adyen payments made via AMEX

PPADYEN → All other Adyen payments

Make sure to select the correct code in TMS4H to ensure accurate reconciliation and reporting.

Adyen web – Status

Adyen uses a series of statuses to track the lifecycle of a payment. Here is a summary of each status and what it means for your payment flow:

- **Received:** the payment attempt has been successfully registered and validated. This is the starting point for all transactions.
- **Authorised:** the payment has been approved by the financial institution. At this stage, you can proceed with delivering goods or services.
- **SentForSettle:** Adyen has sent a request to the financial institution to transfer the funds. Once in this state, the payment can no longer be cancelled—only refunded.
- **SettleScheduled:** the net transaction amount will be paid out to you with a delay, in line with your Sales Day Payout schedule. This status applies only to Sales-Day Payout transactions and appears as *Settled* in reports
- **Settled:** the financial institution has completed the transfer of funds to Adyen.
- **SentForRefund:** a refund request has been sent to the financial institution. Refunds are only possible after a payment reaches *SentForSettle* and cannot be reversed once initiated.
- **RefundScheduled:** the net transaction amount of the refund will be debited from your account with a delay, according to your Sales Day Payout schedule. This status applies only to Sales-Day Payout transactions.
- **Refunded:** the financial institution has completed the refund to the customer.

PSP r...	Merch...	Account	Date ▾	Amount ▾	Payment method	Status
1516438...	UC6IJK28	DEHH-HAHOR	Feb 2, 202...	484.75 EUR	Visa	● Refused
1529438...	UZVIJK28	ESCR-CREAL	Feb 2, 202...	288.87 EUR	American Express	● SettledExternally
1749438...	KILU2QJ7	ESCU-CUENC	Feb 2, 202...	587.16 EUR	Visa	● SettledBulk
6149438...	IKJR29U3	ESMD-SANVY	Feb 2, 202...	291.42 EUR	Mastercard	● SettledBulk
1819438...	KJ9I2UY4	NLZH-DHAAG	Feb 2, 202...	124.27 EUR	iDeal	● SettleScheduled

- **Refused:** the payment was declined by the financial institution, either due to standard rejection or a fraud score exceeding 99. This is a final status.
- **Error:** the payment was received and validated, but an error occurred during communication with the financial institution. This is a final status.
- **Expired:** if an authorised payment remains not captured and not cancelled for 4 weeks, it automatically expires. Once expired, it can no longer be captured. This is a final status.
- **Cancelled:** the payment was cancelled before reaching *SentForSettle*, preventing the transfer of funds. This is a final status.
- **SettledBulk:** a combined status that replaces *SentForSettle* and *Settled* for Visa and Mastercard transactions.
- **RefundedBulk:** a combined status that replaces *SentForRefund* and *Refunded* for Visa and Mastercard transactions.

Adyen refunds

When a prepayment for a non-refundable reservation qualifies for a refund, follow these steps to process it in Adyen:

1. Locate the reservation in TMS4H that needs to be cancelled.
2. Find the corresponding transaction in the Adyen portal before initiating the refund. Use the External Reference from TMS4H to identify the transaction in Adyen, where it appears as the Merchant Reference.

Adyen refunds: “Settled” status

When a payment has reached one of the following statuses:

SentForSettle, *Settled*, *SettledBulk*, or *Settled/SettledExternally*, follow these steps to issue a refund:

- 1. Identify the transaction to be refunded in the Adyen portal.
- 2. Click on the reference number to open the transaction details.
- 3. Select “Refund payment”, then confirm by clicking “Refund payment” again to proceed.

Refunds at this stage are processed as cancellations, since the funds have not yet been settled.

Adyen refunds: “SentforRefund” status

- When a payment is in the *SentForRefund* status, the refund request has been sent and is currently being processed by the financial institution.
- When the status is *Refunded*, *RefundedBulk*, or *RefundedExternally*: the prepayment has been successfully refunded. You can now proceed to make the necessary updates in TMS4H.

FAQs

Agency credit reservations

- ❑ Reservations made through Minor PRO by agencies with approved credit will appear in the monitor without a payment method, as they are paid via voucher/credit.
- ❑ Coming soon: A message saying “*Reservation paid by agency credit*” will appear in the remarks to clarify this.

✕	Status	Reserv.	Arrival	Departure	Conc...	Reservation cr...	Guest Id	Guest Name	Reservation a...	Received a...	Action status	Ext. Refe.	Adyen pay...	Action F

Common error messages & actions

If errors appear in the *Execution Log*, take the following actions:

- ❑ Client 0000192862 flagged as deleted for every company code → Guest ID can't be used: change or delete the Guest ID.
- ❑ A deposit invoice already existed and the action has not been updated → Review and complete the existing deposit action.
- ❑ Deposit amount does not match the one informed in the deposits tab → Review or delete the deposit entered in the reservation.
- ❑ Reservation status is different from Confirmed → Check the reservation status and act accordingly.
- ❑ Action status is different from Pending → Review the action status and proceed as needed.

✓ Important:

Always ensure actions are marked as *Completed* before the arrival date. Otherwise, the default filter (Pending Actions) will not reflect accurate results.

For doubts, issues, or suggestions, please open a JIRA ticket under: SAP Business Suite > TMS for Hotels > Front Office > Billing > Massive Deposits

Cash reconciliation

Prepayment web till movements in TMS

When you register prepayments received via the Adyen virtual payment gateway in TMS, the system generates balancing entries based on the type of charge received.

These entries are visible in TMS alongside other cash movements by navigating to Display Tills (/CCSHT/FC_CA03) → Total Balances

To reconcile these entries, include them in the [Cash Count template](#), in the designated cells for these types of charges.

⚠ The invoiced amounts must always match the information shown in the Adyen portal. You should never register a payment with a prepayment method that does not appear in the Adyen gateway.
