

ONCREDIT INVOICING MONITOR

This new functionality seeks to improve the **Billing & Collection** process **reducing discrepancies** and time-consuming tasks for **credit invoicing** through a monitor in TMS.
The monitor will detect the possible errors according to the specific **Customer ID validations** defined.

ZEY_MONITOR_CRED_INV – OnCredit Invoicing Monitor (SAP_TMS transaction)

- Path in TMS Menu → Billing > Billing > ZEY_MONITOR_CRED_INV - OnCredit Invoicing.

ESSA.CATED - OnCredit Invoicing Monitor

ESSA.CATED NH Puerta de la Catedral ****

Today = Default Departure Date

Filters

Departure date	18.02.2020	to

Net Amount pending to bill in Folio 2

Change the layout according to your needs.

Billing status:

- ● Green: ready to execute / no errors.
- ● Red: pending to check and solve the billing errors.

Click on the color status to see the errors related to the booking. Navigate through the reservation in order to fix it.

Validations - Reservation 0070235632

- Message
- % Commission / deduction doesn't match with the contract
- Concept not allowed: UPSB

Validations: Billing Errors

- Invalid voucher number, incorrect length = incorrect digits, check IDs guide.
- Invalid voucher number, incorrect code = incorrect country/region code, check IDs guide.
- Voucher number is empty = fill in the reference.
- Concept not allowed: XXXX = PKNG, MINB... aren't allowed for credit in the folio 2, move them to another folio.
- Reservation without check-in = only in-house reservations with today as departure date are allowed to bill.
- % Commission / Deduction doesn't match with the contract = check the contract, % is wrong.
- Only deduction mark is allowed = check the contract, the commission mark is wrong.
- Only commission mark is allowed = check the contract, the commission mark is wrong.
- Folio Holder & Main Client doesn't match = folio 2 holder and main client must have the same ID.
- Payer ID doesn't match with the contract = check the contract, the payer ID is empty or wrong.
- Fiscal ID doesn't match with the contract = check the contract, the fiscal ID is empty or wrong.
- Receiver ID doesn't match with the contract = check the contract, the receiver D is empty or wrong.
- Wrong Currency = Check the currency according to the Customer ID (only applies to multicurrency hotels).

ONCREDIT INVOICING MONITOR

Execution Log

- Path in TMS Menu → Billing > Billing > ZEY_MONITOR_CRED_INV - OnCredit Invoicing > Execution Log.
- Through the monitor transaction, you can access to the execution log button which will show all the invoices issued today, and their errors (if applies).

OnCredit Invoicing Monitor - Execution Log

Send Mail Print Invoice → Send/Print massively the invoices according to legal requirements and/or E-invoicing (activated or not). → E-Invoicing

Click on the line to display the error/s.

FAQ

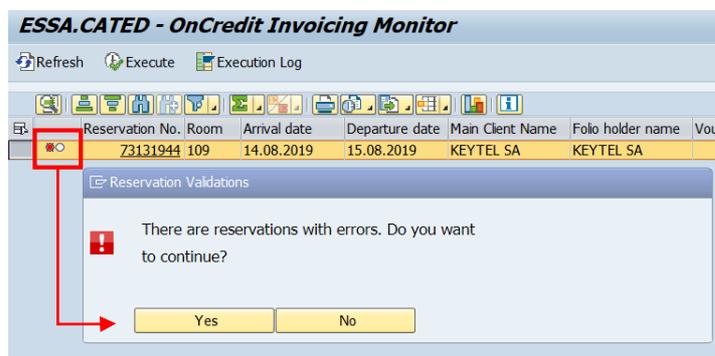

❑ Which are the Customer IDs included in the monitor?

For now, only Hotelbeds and Keytel are included in this project.
Over time, more customers will be added.

❑ Everything is correct in the reservation but the red alert is still shown, why?

In this case, the contract has been deleted from the reservation so the monitor can't validate any parameter in TMS.

After checking that everything is OK in the booking, you can still issue the invoice via the monitor by confirming this pop-up message:

❑ Can I use the monitor to check reservations with future departure date?

Of course you can! Future reservations can be checked and modified but not invoiced yet.
Remind that using the monitor you can avoid discrepancies before the arrival.

❑ Can we correct commission discrepancies in case there are any?

If the production date is in the future, of course yes!

If the production date is in the past, no changes regarding commissions will be applied automatically, but you can fix it before billing.

❑ Are the monitor validations included also in the reservations?

No, these validations only work from the monitor; if you create a booking or bill from the folios, the validations won't be displayed.

❑ Can I issue all the pending invoices at the same time?

Yes! Select the corresponding lines and click on the "Execute" button; after a few seconds you will receive the response from TMS in the Execution Log.

❑ If I move the charges to folio 1, 3 or 4, the reservation disappears, why?

All the validations are included in the folio 2 because the charges go to this folio automatically when the main client is a company or agency.

If you move the charges to another folio or another reservation, the invoice should be managed directly from the booking since it will disappear from the monitor.

E.g. if you have 3 reservations and you route the charges to one of them, you only display the reservation with all the charges.

❑ Doubts, issues or suggestions?

Please open a JIRA using the following category:

SAP TMS > Front office > Billing > OnCredit Invoicing Monitor (drop list).
